

Technical data sheet:

Mohawk Via Felt: *expressive colour and texture*

Mohawk Via Felt offers a distinctive felt-marked texture reminiscent of that achieved by the traditional wool felts used in the paper-making process since the 19th century.

Available in white, natural, fibred and deep shades, this sophisticated finish brings another dimension to any printed project.

- Specified by the US print and creative communities for over 25 years
- Delivering Mohawk quality and performance at a budget-friendly price point
- Manufactured acid free to meet ANSI standards for archival permanence
- Excellent on-press performance – uniform, stable and consistent
- Available with i-tone surface technology for HP Indigo printing
- Manufactured with wind energy, produced carbon neutral and FSC certified
