## Recyclability of cartonboard

MM BOARD & PAPER confirms that our cartonboard qualities can be classified as “recyclable” within standard stock preparation of the packaging paper industry. This was demonstrated by practical tests at our WLC mills and also by evaluation of independent laboratories.

Please note that the recyclability also depends on the packaging design and construction as well as the available recycling technologies in specific regions.

On behalf of  
MM BOARD & PAPER

Dr. Sigrid Gerold  
Head of Group Product Safety & Quality
