

## PPWR Statement

All the board grades produced by Pankakoski Mill Oy are manufactured solely from virgin wood fibers and additives.

All the raw materials used in board production are approved for direct food contact and possible health risks have been considered in those approvals.

In response to Article 5.5 of the EU Packaging and Packaging Waste Regulation (PPWR), we confirm following:

- PFAS are not intentionally added to any of Pankakoski Mill Oy's raw materials, formulations, or production processes
- As no PFAS are present in raw materials or production environments, the potential for unintentional contamination is considered very low
- PFAS analysis is included in Pankakoski Mill Oy's product testing conducted by accredited external laboratories
- PFAS analyses are performed using accredited methods
- Results obtained have been below 2.5 µg/kg, ie. 2.5 ppb
- PFAS analyses are performed as part of Pankakoski Mill Oy's product specific food safety certification, with testing carried out at intervals of max. up to three years
- The heavy metal limit (total Pb, Cd, Hg, Cr(VI) ≤ 100 mg/kg) is met.

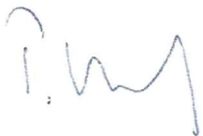

Based on the above, we confirm that all Pankakoski Mill Oy's products comply with the PFAS restrictions & heavy metal limit under the PPWR.

Additionally, we can confirm that all board grades are fully recyclable.

Pankakoski Mill Oy remains committed to monitoring regulatory developments and ensuring continued compliance.
